238 BUTTE ST STEUBENVILLE OH 43952

Meet Robowash the simplest most cost effective car wash on the market today!

We've taken 20 years of frustration in operating and maintaining touch free automatics, and decided all that really needs to happen is apply the correct chemicals at the correct concentration, then rinse them off..

If your tired of overpriced, proprietary replacement parts, equipment that is difficult to service, and frequent failures resulting in multiple visits from service techs who throw parts at the problem, then you will love **Robowash!** All parts are off the shelf, all components are easy to get to, and the wash operation is so simple, nothing can go wrong.
